### **Lafourche Parish Government Employees Complete Phase 2 Move At Mathews Complex**

(Mathews, La.) – The Lafourche Parish Government Permits, Planning and Public Works Departments in Mathews are now relocated in new offices within the LPG complex at 4876 Hwy. 1, Parish President Charlotte Randolph announced Tuesday.

Department of Public Works Director Kerry Babin said the departments completed the move Tuesday without any interruption of service to the public.

Babin said Phase 2 of the renovation proceeded on schedule and without delay. He added that the Louisiana Fire Marshal's Office approved the move into Phase 2 last week following the weekly construction progress inspection.

Phase 3 of the renovation, which includes the Council chamber, will begin soon and is expected for completion in February 2012.

The move is part of the \$2.7-million renovation funded by a Community Block Development Grant.

LPG moved into the location after the Raceland complex was heavily damaged in 2008 by Hurricanes Gustav and Ike.

Currently, BET Construction is re-building the interior of the complex based on a design by the architectural firm Weimer Gros Flores.
