Power Restored to Two Hospitals and Some Residents

Entergy officials reported tonight that power has been restored to Ochsner St. Anne General Hospital in Matthews and Lady of the Sea General Hospital in Galliano. As a result, many area residents around those hospitals had power restored as well.

If you live in one of those areas and do not have power restored, it is likely because there is an individual problem near your residence. You DO NOT have to call Entergy. Work crews established power in these areas as a priority to get power to these hospitals. They will continue to work on the highest priority areas in the near future, but will address every customer in a timely manner.

“I want to thank the Lockport network for their time and effort in getting these hospitals up so quickly,” said area Entergy representative Amy Martinez. “A large number of these workers had a lot of damage to their homes to deal with, but instead, they are out orking to get power restored for everyone else. We ask the public to be patient and understanding throughout this process. Our crews are working as quickly and as safely as possible to get power restored to all our parish residents.”
